

Vinyl Plotter

The Saga uses *Easy Cut Studio* software which is installed on the adjacent computer.

It is simplest to design your cut in *Easy Cut* using the library of shapes & fonts.

If you have a particular vector file (SVG, EPS, AI) file you want to use it can be imported into your project.

Saga 1350IP Vinyl Cutter

There appears to be a registration mark system (ARMS) reader on the plotter, but *Easy Cut* doesn't recognize it.
